

## River Scene Craft

### Materials

- Coffee filters
- Paper towels
- Twine or string
- Washable Crayola markers
- Sponge paint brush
- Construction paper for animal cutouts (or pre-made animal cutouts)
- Single hole punch
- Glue stick
- Scissors
- Cup with water
- Paper plate

### Instructions

1. Place coffee filter on paper plate. Use washable markers to draw a river design on the coffee filter. You can do any design that you would like!

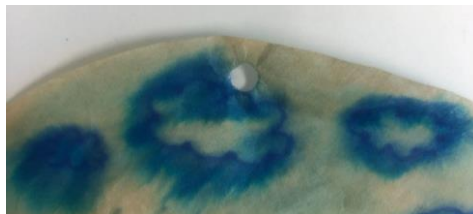

2. Wet a sponge brush with the water inside your cup. Gently brush your marker design with water so the color spreads on your coffee filter. You may need paper towels to dry up any excess water.

3. Allow the water to dry.
4. After the coffee filter has dried, glue your animal cutouts to your design.

5. When you are done decorating, use a single hole punch to make a hole on the top center of your coffee filter.

6. Thread your string through the hole and make a knot. Now you can hang your stained glass on a window!
